

## Which contain alcohol?

Most people can't tell. **AB 346**, a simple alcopop labeling bill, would change that.

## Which contain alcohol?

Alcopops look deceptively similar to non-alcoholic drinks. Retailers, parents, law enforcement officers, and teachers need help recognizing alcopops to keep them out of the hands of young people.

AB 346 would help identify products that contain alcohol, and in doing so reduce underage drinking, save lives, and save California millions in alcohol-related costs.

**I support AB 346 and urge you to help pass this important bill.**
